

Setting up Guide for C2DREK (GID) Bot (Update 03/11/2022)

- 1.Download bot file from left panel on your member home
- 2.Check the windows version required windows 10 v.1909 If you have the same windows you can have to go to next step if no download and install it and make sure you have all driver before next step
- 3.Install C++ inside Rekbob folder
- 4.Disable windows virus and windows update by using batch script inside Rekbob folder

 win 10 Enable and Disenable Defender.zip	21-Oct-22 12:42	WinRAR ZIP archive	22 KB
 win 10 enable and disenable updates.zip	21-Oct-22 12:45	WinRAR ZIP archive	186 KB

-Extract both of this files

-Run As admin With the file name “**Disnable Defender--run by admin**” inside the folder you has to extract (**Enable and Disenable Defender**)

-Run As admin With the file name “**disenable**” inside the folder you has to extract (**win10 enable and disenable updates**)

- 5.Go to login your blizzard and waiting until main menu screen

Step by step

-Go to Option > Video Change Full Screen to Windows Mode

-Change Resolution to **1280 x 720**

-Save

-Exit the game

-On blizzard launcher > click your profile > log out > uncheck “**keep me logged in**”

6. Launch CDRektBot.exe by right click and select Run as admin

7. Fill your keys that you get from web (<https://revamped.app/shop/member>) to CDRektBot launcher
